

About Company

The plastic products made by Spetztekhnastka Ltd have been widely known at Ukrainian market for over four years. Starting 2005 “Vital Plast” is a new brand name to stand for a wide range of plastic products. Consumers representing food and paint industries, public catering continuously use packaging products and greatly appreciate a high quality of the products.

“Vital Plast” opens up infinite opportunities to meet individual customer needs in plastic products. There are several principles that comprise our company’s philosophy: expertise, flexibility and speed. We continuously demonstrate customers that we are the company understanding their needs and a reliable partner with a high expertise.

Flexibility, expertise and short production time are assured by three main advantages of the company:

1. Design development and engineering solutions are suggested by a highly qualified team of designers and engineers of Spetztekhnastka who work closely with a customer during development stage.
2. Injection molds are made in Tooling Department of Spetztekhnastka Ltd that stands highly in many countries.
3. Plastic products are molded on state-of-the-art injection molding machines by Mannesmann-DEMAG, Arburg, that ensure a high quality of products.

In 2014 the company Bureau Veritas Certification carried out a certification audit in the system of food safety management production of plastic products. Based on the results of this audit there was issued a Certificate confirming the compliance of the management system to ISO 22000: 2005.

Products

«Vital Plast» product specifications:

- **Quality**
All products are made in accordance with TU U 13429839.002-2000 and requirements of sanitary and epidemiological commission of Ukraine. The quality is controlled in Measuring Laboratory.
- **Functional and attractive design**
During development stage the recent industry trends are considered
- **Opening control system**
All containers have got a single rim with a control element and supplied with lid lifting protection
- **Individual coloring**
There are different colors available at option
- **Rigid structure**
Design solutions implemented in packaging enable storing in small space.

Company maintains a quality management system.

Usage of own transport enables to significantly reduce product delivery costs.

We deal with all requests on production of custom-designed packaging other plastic products.
